AWARDS

MICROSOFT MVP

2018 - 2025 - *Microsoft*

I have received the *Microsoft MVP* award in the *Developer Technologies* category for seven consecutive years.

GITHUB STAR AWARD

2021 - 2023 - *GitHub*

Received the *GitHub Star* award for three consecutive years. I was the 49th person to receive it, and the first Swede.

WORK EXPERIENCE

Mar 2019 - Present — Stockholm

MITIGRAM – Software Developer *(freelancer)*

Mitigram is a SaaS provider within the trade finance space, trusted by big corporations and banks worldwide.

I started as an interim tech lead and have, by now, been involved in nearly every aspect of their operations; everything from setting up their CI/CD pipelines to rewriting the compiler for their financial instrument DSL.

I've also worked extensively the last couple of years on designing and writing parsers, validators, and generators for the SWIFT and EBICS file format standards, which are core to their business.

Mar 2018 - Mar 2019 — Stockholm

IF INSURANCE – Software Developer *(freelancer)*

At *If Insurance*, I worked as a back-end developer as part of a team responsible for online sales functionality.

Jan 2017 - Mar 2018 — Stockholm

AMTRUST INSURANCE SERVICES – Software Developer *(freelancer)*

At *AmTrust Insurance Services*, I was responsible for building a new claims management system for their phone insurance business (*Trygg48*).

Sep 2014 - Feb 2017 — Stockholm

TOBII – Software Developer

I worked on the different SDKs for *Tobii*'s first commercial eye tracker. I was part of the team that wrote SDKs for *.NET* (*C#*, *WPF*, *WinForms*), *C++*, *Unity*, and *Unreal Engine*. I also took on the responsibility of maintaining the build infrastructure for *Tobii Tech*, which included supporting various teams with their build-related issues.

Apr 2012 - Sep 2014 — Stockholm

LÄNSFÖRSÄKRINGAR – Software Developer *(via tretton37)*

I was part of a team implementing the *Solvency II* directive for *Länsförsäkringar*'s insurance business. This included building a calculation engine to distribute long-running, intensive calculations to different servers, as well as a thin client to configure, monitor, and control said calculations.

May 2010 - Apr 2012 — Göteborg

3BITS CONSULTING – Software Developer

I worked as a software developer for several customers within e-commerce, such as *Lindex*.

Mar 2007 - May 2010 Göteborg

WIPCORE – Software Developer

I worked as a consultant where I mostly implemented backend services and integrations for different Swedish retailers such as *Lindex*, *Siba*, *NetOnNet*, *CDON*, and *Clas Ohlson*.

Feb 2006 - Mar 2007 Borås

NETONNET – Software Developer

This was my first real job in the industry. I was one of four developers for one of the most visited B2C e-commerce sites in Sweden.
